PROFESSIONAL SUMMARY

Aspiring Python Developer and MCA (AI & Data Science) student with a strong 75% academic record in BCA. Technically proficient in building functional applications and automation tools using Python. Experienced in CLI application development, Linux administration, and Data Structures & Algorithms (DSA). Focused on writing clean, efficient code and pursuing a career in Python development and Data Engineering.

TECHNICAL SKILLS

Programming:	Python (OOP, File Handling), C++, Java, C, Shell Scripting
Data Science:	NumPy, Pandas (Basics), Requests (Web Scraping), Statistical Modeling
Tools & Tech:	Git, GitHub, VS Code, Linux Administration, SQL, Apache Web Server
Competencies:	Data Structures & Algorithms, Linux Automation, Logic Design

EDUCATION

Vivekananda Global University | Jaipur, RJ
Master of Computer Applications (MCA) in AI & Data Science | Expected June 2027

- Current Status: 2nd Semester (Examining in June).
- Focus: Advanced Python for AI, Statistical Modeling, and Advanced DSA.

Purnea University | Purnia, BR
Bachelor of Computer Applications (BCA) | Graduated 2024

- Academic Performance: 75%

TECHNICAL PROJECTS

- CLI-based ATM Application | Python**
- Developed a standalone Command Line Interface (CLI) application to simulate core banking operations.
 - Implemented secure PIN authentication, balance inquiry, withdrawal, and deposit functionalities.
 - Applied Python exception handling and input validation to ensure a robust user experience.
- Web-based ATM Simulation & Automation**
- Engineered a web-accessible ATM interface utilizing Shell Scripting and Apache web server.
 - Designed backend logic for transaction security and authentication protocols.

ACTIVITIES & INTERESTS

- Problem Solving:** Solving DSA problems in C++ and Python to optimize time/space complexity.
- Linux Automation:** Enthusiastic about automating system tasks using Shell Scripts and Cron jobs.
- Open Source:** Maintaining an active GitHub profile to document automation scripts and AI projects.
